PROFESSIONAL SUMMARY

Mobile Team Lead and Senior Flutter Engineer with 7+ years shipping production iOS and Android apps end to end - architecture, native integrations, and people leadership. I currently lead a 10-engineer mobile team running 4-5 concurrent products, including Krisp (an AI voice-processing app). I champion AI-assisted engineering across the organization: I drove daily, strategic adoption of Claude Code and other AI tools, wrote internal enablement guides, and coach both engineers and non-engineers on effective prompting and agentic workflows. I reach into the native layer in Swift and Kotlin whenever cross-platform alone is not enough - Twilio Voice, the Krisp noise-cancellation SDK, background upload pipelines, and Platform Views. Author and maintainer of 7 published Flutter packages on pub.dev (2,000+ combined monthly downloads). I collaborate daily with Product, Design, QA, and Backend, mentor through 1:1s and code review, and own delivery from scoping and estimation through retrospectives.

LEADERSHIP & AI ENABLEMENT

Team Leadership Lead a 10-engineer mobile team; technical roadmap ownership, 1:1s, mentoring, hiring & interviewing, code-review culture, estimation & planning, Agile/Scrum delivery.

AI-Assisted Engineering Claude Code, Cursor, GitHub Copilot; AI workflow design, prompt engineering, custom slash commands, MCP integrations, and hands-on team enablement/training.

Cross-Functional Deep collaboration with Product, Design, QA, and Backend; stakeholder communication, scoping, risk management, and retrospectives.

TECHNICAL SKILLS

Languages Dart, Swift, Kotlin, Java, Python, Rust, JavaScript

Mobile & Native Flutter, Flutter Web, iOS (Swift / UIKit), macOS (AppKit), Android (Kotlin / Java), React Native, Platform Views, Platform Channels, Native Audio/Video APIs

Architecture & State Clean Architecture, MVVM, BLoC, MobX, Riverpod, Provider, Freezed, Dependency Injection

Real-Time & APIs REST, WebSocket, WebRTC, Firebase (Auth, Firestore, FCM), Real-Time Audio Processing

Payments & Commerce Stripe, In-App Purchases (App Store, Google Play), Subscription Management, Passkey Authentication

Cloud & DevOps Google Cloud Platform, Firebase, CI/CD (Codemagic, GitHub Actions, Fastlane), Git, GitHub, GitLab, Docker

Quality Code Review, Performance Profiling, Automated Testing, App Store & Play Store release management

Integrations & SDKs flutter_rust_bridge, Twilio Voice SDK, Krisp SDK, TradingView, HighCharts, StoreKit, Zendesk

Design & Collaboration Figma, Material Design, Custom Animations, Responsive UI, Jira, Confluence

PROFESSIONAL EXPERIENCE

Flutter Developer & Mobile Team Lead • M-One May 2020 - Present
Software design and development company delivering mobile and web solutions for international clients. Lead a 10-engineer mobile team running 4-5 concurrent projects, including Krisp. Have worked as both individual contributor and Team Lead throughout tenure.

Krisp Mobile - AI-Powered Voice & Meeting App - Mobile Team Lead (current)

- Lead Flutter development, mobile architecture, and delivery for the Krisp iOS and Android app (a leading AI voice-processing company); own the technical direction across both platforms.
- Champion AI adoption across the team: rolled out Claude Code, authored internal guides on commands, subagents, MCP, hooks and settings, and coached engineers, designers, and PMs on effective prompting and agentic workflows.
- Mentor engineers through 1:1s, structured code review, and estimation/planning; interview and onboard new mobile hires.
- Natively integrated Twilio voice calling in Swift (iOS) and Kotlin (Android), paired with the Krisp noise-cancellation SDK for clear, low-latency calls.
- Designed and built a native background upload pipeline for large audio files that survives app suspension and auto-resumes on network failure.
- Built real-time audio processing and Flutter platform-channel bridges to the native audio stack.
- Collaborate closely with Backend, Product, and Design to shape and optimize feature delivery.

Stack: Flutter, Dart, MobX, Swift, Kotlin, Twilio Voice SDK, Krisp SDK, Platform Channels, Native iOS/Android Audio APIs

Bitsgap - Cryptocurrency Trading Platform - Mobile Team Lead

- Led a team of 4 Flutter developers (within a 10-person cross-functional team) to build the mobile app from scratch, including overall architecture.
- Integrated Dart with Rust via flutter_rust_bridge to share a secure core library across platforms.
- Implemented passkey authentication to strengthen login security and reduce account-takeover risk.
- Built React-based web integrations with TradingView, HighCharts, and Zendesk to unify the trading experience.

Stack: Flutter, Dart, MobX, Freezed, REST API, WebSocket, React, Rust, Stripe, In-App Purchases, CI/CD

Viveo Health - Telemedicine Platform - Flutter Developer

- Part of a 10-person team building a white-label healthcare platform for Estonia, later scaled globally (1.5 years of development).
- Owned the real-time chat and video-call module (WebRTC) across iOS and Android, plus UI/UX polish.

Stack: Flutter, Dart, MobX, Freezed, REST API, WebRTC, WebSocket, Firebase, Stripe, Swift, Kotlin

Fudy - QR-Code Ordering for Restaurants & Hotels - Mobile Team Lead

- Led 4 mobile developers within a 12-person team over 7 months to deliver a QR-based ordering and payment experience that reduced customer wait times.
- Implemented QR scanning, dynamic menu management, real-time order tracking, and Stripe payments.

Stack: Flutter, Dart, MobX, Freezed, REST API, WebSocket, CI/CD, Firebase, Stripe, Google Cloud Platform

JITMeal POS - Cloud Point-of-Sale System - Mobile Team Lead

- Led 3 Flutter developers (7-person team) to build the POS system from scratch - order taking, inventory, reporting, and profit analytics.
- Designed the application architecture for order flow and real-time order processing; optimized the Flutter Web build for in-store terminals.

Stack: Flutter, Dart, MobX, Freezed, Flutter Web, REST API, WebSocket, CI/CD, Online Payments

Earlier M-One projects - Team Lead / Flutter Developer

- HiLife (wellness): rewrote architecture and added caching for a major startup-performance overhaul; custom video player and subscription flow.
- Perfect.Life (luxury concierge): sole Flutter engineer on a 7-person team; delivered the MVP in 6 months - concierge chat, event calendar, curated catalog, payments.
- HR Drone (anonymous recruitment): built registration, dynamic questionnaires, job-match scoring, and anonymous chat on mobile.

Software Engineer • 10X Engineering

Oct 2018 - May 2020

Design and integration of automated test systems for wireless products; custom hardware and software including RF record-and-playback.

- Smart Mirror: single-handedly built an interactive advertising display over 6 months (hardware + software), with distance-triggered mode switching and a Firebase-backed CMS.
- PinoKIT: delivered affordable STEM education hardware kits with companion software, experiment tracking, and data-visualization tools.

Stack: Java, Python, Python QT, Firebase, Raspberry Pi 4, distance sensors, Figma

OPEN SOURCE - PUBLISHED FLUTTER PACKAGES

Author and maintainer of 7 packages on pub.dev, 2,000+ combined monthly downloads.

- cupertino_native_plus - native iOS/macOS widgets via Platform Views with pixel-perfect fidelity and Liquid Glass effects.
- flutter_markdown_stream - flicker-free streaming Markdown that renders partial LLM token streams progressively, handling unclosed syntax gracefully.
- flutter_blocknote_editor - embeds BlockNoteJS in a Flutter WebView with bidirectional communication, transaction batching, and undo/redo safety.
- hydrated_mobx - MobX extension that persists and restores stores via Hive across iOS, Android, Web, Linux, macOS, and Windows.
- app_store_country, story_maker, all_sensors2 - storefront country codes via StoreKit, an Instagram-style story editor, and sensor data access.

EDUCATION

B.Sc. in Software Engineering - National Polytechnic University of Armenia, 2020

LANGUAGES

- Armenian - Native
- Russian - Full professional proficiency
- English - Professional working proficiency
